

## Dino-Lite DermaScope HR MEDL7DM

For examining the human skin the 5 Megapixel Dino-Lite digital Dermoscope with metal body is a very convenient instrument. You can make better and clearer skin pictures than any standard digital camera with macro button can provide. A magnification from 10 ~ 70x, ~200x makes it possible to capture highly detailed pictures of skin lesions. The built-in polarizer filter minimizes the glaring effect of the skin.

<b>Model</b>	DermaScope HR MEDL7DM
<b>Resolution</b>	Up to 5 megapixel (2592x1944 pixels)
<b>Magnification</b>	10 ~ 70x, ~200x
<b>Interface</b>	USB 2.0, High speed USB transmission
<b>Nr. of LED's</b>	8
<b>LED on/off switchable</b>	√
<b>LED color</b>	White
